The screenshot shows the OneCompiler web interface. The browser address bar displays 'onecompiler.com/scala/3zkhmtdw'. The page title is 'code-1 - Scala - OneCompiler'. The code editor contains a file named 'HelloWorld.scala' with the following Scala code:

```
1 object HelloWorld {  
2   def main(args: Array[String]): Unit = {  
3     println("Hello, world!")  
4     println("Scala language: "+util.Properties.versionString)  
5   }  
6 }
```

The right sidebar shows the 'Output' section with the following text:

```
STDIN  
Input for the program ( Optional )  
  
Output:  
Hello, world!  
Scala language: version 2.13.8
```

A 'FEEDBACK' button is visible on the right side of the editor.

The screenshot shows the OneCompiler web interface. The browser address bar displays 'onecompiler.com/scala/3zkhmtdw'. The page title is 'code-2 - Scala - OneCompiler'. The code editor contains a file named 'HelloWorld.scala' with the following Scala code:

```
1 object Hello extends App {  
2   println("Hello, world")  
3   println("Scala language: "+util.Properties.versionString)  
4 }
```

The right sidebar shows the 'Output' section with the following text:

```
STDIN  
Input for the program ( Optional )  
  
Output:  
Hello, world  
Scala language: version 2.13.8
```

A 'FEEDBACK' button is visible on the right side of the editor.
